DIFFERENCE BETWEEN STORM & SANITARY SEWER SYSTEMS

What is an MS4?

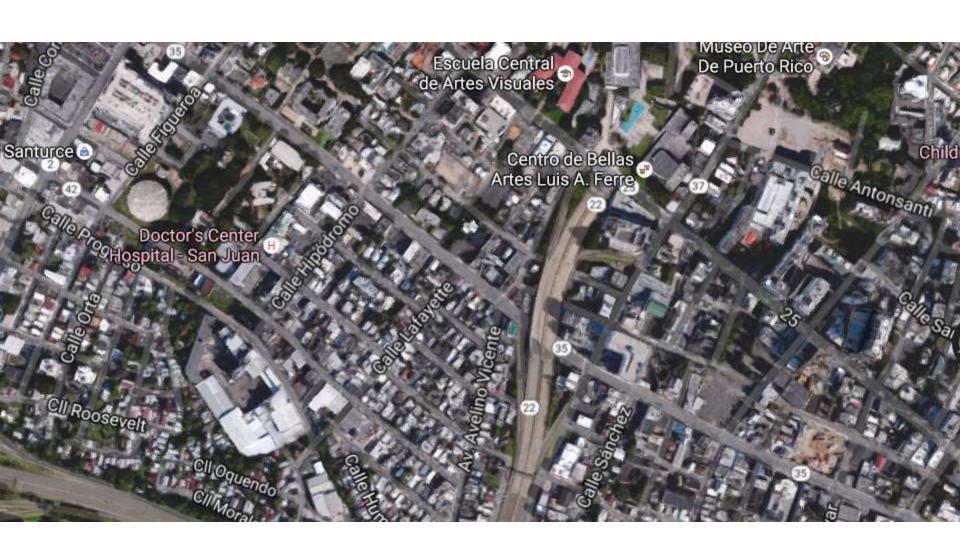

- A municipal separate storm sewer system (MS4) is:
 Municipality Separate Storm Sewer System
- A conveyance or system of conveyances... owned by a state, city, town, or other public entity that discharges to waters of the U.S. and is:
 - designed or used for collecting or conveying stormwater
 - not a combined sewer
 - not part of a Publicly Owned Treatment Works (POTW)

DRNA-MS4-Tool Kit #1

Programa de Identificación de Alcantarillas Pluviales

La oficina de Zona Costanera y Cambio Climático y la Secretaria de Educación del Departamento de Recursos Naturales y Ambientales (DRNA) de Puerto Rico han desarrollado un Programa de Identificación de Alcantarillas Pluviales con el fin de prevenir la contaminación de nuestros cuerpos de agua. Este Programa forma parte de las Buenas Prácticas que componen las Medidas Minimas de Control de Educación, Participación Pública e Identificación y Eliminación de Descargas Ilicitas del Programa de Manejo de Escorrentias desarrollado en cumplimiento con los requisitos del Permiso No. PRR040048, a su vez en cumplimiento con el Permiso General de Manejo de Escorrentias del 2016 de la Acencia de Protección Ambiental.

Los objetivos del Programa son (1) proveer nerramientas de Educación que ayuden a identificar las alcantanillas pluviales

y a crear conciencia de que toda agua que llega al sistema de recolección de agua de escorrentia. fluye directamente a través del sistema pluvial y es descargada en un cuerpo de agua (rios, arroyos, quebradas y playas entre otros) sin recibir ningún tipo de tratamiento; (z) concientizar al público general sobre la diferencia entre el sistema de alcantarillado pluvial y el sanitario y el impacto negativo y riesgo de contaminación que podría tener el arrojar desperdicios, basura, restos de pintura, material vegetativo y otros contaminantes, en si cualquier sustancia que no sea agua de lluvia por las mismas; (a) proveer apoyo a los programas de educación y de perticipación comunitaria de los distintos MS4s en Puerto Rico. Este programa se hace público en conjunto con la información educativa que comprende el mismo para el beneficio de otros MS4 en Puerto Rico. El DRNA a través de este MS4 Tools Kit pone a la disposición de todos los MS4 los siguientes materiales.

- Listado de Materiales Necesarios y Adicionales para Desarrollar e implementar un Programa de Identificación de Alcantarillas Pluviales en el MS4.
- Procedimientos Básicos Previos a la Implementación del Programa de Identificación de Alcantarillas Pluviales.
- Procedimientos para el Día de la Instalación de las Chapas o Marcadores en las Alcantarillas Pluviales.

PR TFWs STORM DRAIN IDENTIFICATION PLANNING

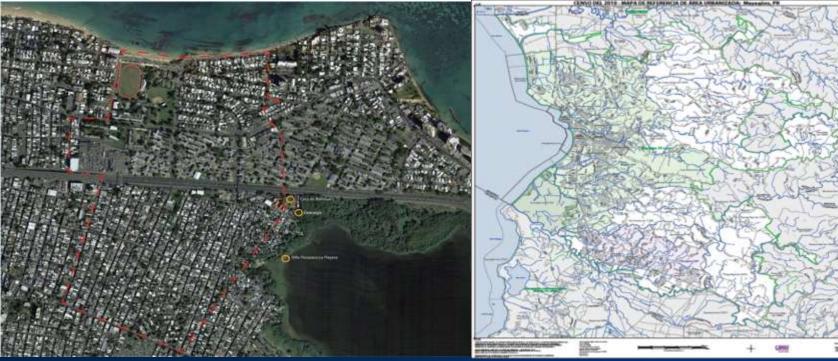

PR TFWs STORM DRAIN IDENTIFICATION PLANNING

IDENTIFY AN URBAN AREA TO BE IMPACTED

Get information on the amount of storm drains markers needed, the conditions of the area, and if they need to be cleaned before conducting the activity.

PR TFWs STORM DRAIN IDENTIFICATION PLANNING

ASSEMBLE A FIELD TEAM

PR TFWs STORM DRAIN IDENTIFICATION PLANNING

CONTACT THE MUNICIPAL

Request a copy of the storm sewer system maps to the Municipal MS4 Coordinator

Check the storm drains to make sure they are clear of any debris, sediments, plastic trash, leaves, or grass clippings

If the storm drains need to be cleaned, contact the Municipal MS4 coordinator and request them to clean the storm drains before the Storm Drain Identification Activity

Request the Municipal MS4 Coordinator to paint a strip of 5" around the storm drain
